

Bubo

CURIOUS FAMILY

Nikolaj Klitgaard has spent most of his life designing various items made in wood. He has grown through the ranks despite his young age and he is already regarded a renowned craftsman. His passion and creativity began at a very tender age: Klitgaard created his first pieces in his grandfather's carpentry workshop. Klitgaard's specialty is the lathe where he designs unique characters and brings them to life.

Nikolaj Klitgaard shaped the very first Bubo by hand in 2013 in his grandfather's workshop. The result of the passion for woodworking and eye for details is the perfection of the small family of two sizes of Bubo. The mobile round head can be turned in all directions and the magnetically attached arms can be placed in different positions.

- The passion for woodworking and the eye for details
 - A small family of two sizes
 - Mobile head
 - Moveable arms, magnetically attached to the body
-
